PROFESSIONAL SUMMARY

Industrial engineer and data analyst with 3+ years in operations and supply chain before moving into data. I turn operational and CRM data into clean datasets, KPIs and dashboards that support decisions. At CIMA (University of Navarra) I integrated the fundraising team's data sources into a master dataset and built an RFM dashboard that became four action strategies.

SKILLS

Analysis & BI: Python (pandas), SQL (PostgreSQL), Power BI (DAX), Excel (advanced), R, Git
Data: Data cleaning and quality, data integration / ETL, dimensional modeling (star schema), Salesforce CRM
Business: KPIs and reporting, RFM / customer segmentation, process improvement, supply chain and logistics

PROFESSIONAL EXPERIENCE

Data Analyst (Fellowship) — Institutional Development

CIMA, University of Navarra · Pamplona · 09/2025 – 11/2026

- Integrated and normalized CRM (Salesforce) and Parquet sources into a master dataset for analysis and maintenance of the internal database.
- Built a Python + Chart.js dashboard over 2,300 donor records, translating RFM segmentation into four actionable strategies for the fundraising team.
- Designed and built a Python pipeline (SerpAPI + LLM APIs) that enriches and prioritizes prospect profiles from open sources: 56,000+ records processed, ~10 qualified profiles per week with human review.
- Automated Salesforce record creation with Power Automate Desktop, replacing manual data entry.

Logistics Operations Manager

KUAI Logistics S.A. · 08/2023 – 08/2024

- Designed and tracked operational-efficiency KPIs used in supplier negotiations and management decisions.
- Coordinated logistics planning, inventory management and transport route optimization.
- Negotiated with suppliers and monitored cost and quality, identifying operational improvement opportunities.

Supply Chain Analyst

VF Corporation · 03/2023 – 07/2023

- Built a supplier-allocation model aimed at reducing operating costs, aligning requirements with brands and export standards.
- Analyzed and resolved supply chain issues; produced production reports and tracked operational metrics.

Operations Coordinator

Hugo Technologies S.A. · 07/2020 – 02/2022

- Reduced estimated delivery time (ETA) by 18%, making the operation the best-performing in the region.
- Optimized distribution logistics and led operations teams, monitoring service-level KPIs.

PROJECTS

Operations Analytics Platform — Personal project

Olist e-commerce data, 100K orders · 2026 · github.com/crobleto97/ops-analytics-olist

- Built an end-to-end pipeline: Python ingestion with data-quality checks into PostgreSQL, a star schema (2 fact tables, 5 dimensions) and SQL KPI views with CTEs and window functions.
- Built a 3-page Power BI report (DAX) showing that late deliveries (6.8% of orders) halve review scores and that 3% of sellers cause half of late orders; versioned in Git as a PBIP project.

EDUCATION

MSc in Data Analysis for Engineering

TECNUN, University of Navarra · 2024 – 2026

Master's thesis: automated OSINT + LLM pipeline to qualify and prioritize potential donors at CIMA.

BSc in Industrial Engineering

Universidad Americana (UAM), Nicaragua · 2015 – 2019

Diploma in Logistics Operations, UAM · 2019

LANGUAGES

Spanish — native · English — C1
